All the best to the students

# IF YOU THINK YOU CAN,... YOU REALLY CAN. But IF YOU THINK YOU CANNOT... YOU KNOW.... YOU ARE QUITE RIGHT.

\*

Although Many A People Believes In <u>The Role Of Fate</u> In Success, Yet A Few People Know How To <u>Plan Success</u> Without Fate.

\*

Qualification Does Never Provide A Job.
Qualification Has To Be Converted To Effectiveness;
Effectiveness Has To Be Converted To A Winning Habit,
And It Is The Winning Habit That Will Lead You To Your Dream Job.

\*

If Our Past Action Has Resulted In Our Present
(Which Does Not Make Us Happy)
Then Why Brood?
The Immediate Logical Conclusion Follows Is
That Our Future Will Be The Result Of Our Present Action.

\*

WHAT IS REQUIRED, IS THE ATTITUDE, TO CHANGE OUR PRESENT.

•

Now, Let's do it together. (EXPERTISE OF VANIK AND DYNAMISM OF YOURS),

Shall We?

Slow and steady never wins the race. If the story teller of the "tortoise and the hare" fable had not made the hare sleep, then this morale would never have been doing rounds around the world.

So also "fast and furious". Any number of these sequels you take, including the recent release 8, the hero wins because the script makes the villain commit mistakes.

That brings us to another line of thinking in the competitive ring. Usain Bolt had to run and practice for more than 10 Years to become a champion that lasted about 10 seconds.

Perseverance is what I want to talk about. Perseverance is the key. Walking on and on with failures and successes, analysing, correcting, retrying ,failing and succeeding, followed by a series of failures, showers of comments from peer groups and parents, a dwindling finance on the way, a fading will power, a running away age are all mates, who one normally come across while travelling to the exotic location of success. A hope amidst the wilderness of hopelessness is perseverance.

Perseverance hones the skills. Perseverance kills drudgery. Perseverance nullifies unconscious phobias, illusions and hallucinations present within one's own self.

Perseverance recreates the latent will power, propels it, pushes through all thick and thins till the romantic horizon where dream hugs destiny.

In some people perseverance is inborn, they drive themselves. Some people learn it from masters. They drive themselves.

Where do we stand? Let's learn it, imbibe it, and put it into practice.

Your Destiny is ready to hug you. Just walk the length. Just learn to walk alone with perseverance.

May Angels Walk With You.

**Direction (Q. 96 to 100):** These question are based on the following passage. Read it carefully. Pick the most appropriate and contextually apt answer from the options given after each question.

Rather than saying that little boys and little girls, from the very start, learn two different ways of speaking, I think that the process is more complicated. Since the mother and other women are dominant influences in the lives of most children under tha age of 5, probably both boys

and girls first learn 'women's language' as their first language. As they grow older, boys especially go through a stage of rough talk; this is probably discouraged in little girls more strongly than in little boys, in whomparents may often find it more children are 10 or so, and split up into same –sex peer groups, the two languages are already present, according to my recollections and observations. But it seems that what has happened is that the boys have unlearned their original froms of expression, while the girls retain their old ways of speech. The ultimate result is the same, of course, whatever the interpretation.

So a girl is damned if she does, damned if she doesn't. If she refuses tp talk like a lady, she is ridiculed and subjected to criticism as unfeminine; If she does learn, she is ridiculed as unable to think clearly, unable to take part in a serious discussion: in some sense, as less than fully human. These two choices which a woman has – to be less than a woman or less than a person – are highly painful.
